How are we doing in Wales?

Public Engagement Survey on Health and Wellbeing during Coronavirus Measures

February 2022

World Health Organization Collaborating Centre on Investment for Health and Wellbeing, Public Health Wales

Public Health Wales are conducting a public engagement telephone survey to ask members of the public in Wales how coronavirus and related control measures are affecting their health and wellbeing.

The survey began in April 2020 and currently operates on a monthly basis. It includes a set of routine questions with other questions changing depending on emerging issues.

Survey data are adjusted to represent the Welsh population by age, sex and deprivation*.

We thank the people of Wales for giving us their valuable time to support this work.

Key findings

1004 Welsh residents aged 18 years and over were interviewed in February 2022*

38%

of people said they were 'not at all' worried about catching coronavirus; up from 30% in January 2022.

50%

of people said they were 'not at all' worried about losing someone they loved to the virus; up from 38% in January 2022.

76%

of people agreed they felt a strong sense of control over their life. However, 12% disagreed and the remainder neither agreed nor disagreed. Participants were asked how happy they were with a range of aspects of life in Wales. Being happy refers to scores of 7-10 on a scale from 0 (not at all happy) to 10 (completely happy).

78%	of people were happy with their life in general.
(00/	of needle were henry with the NUIC in general

- 69% of people were happy with the NHS in general.
